TOYO TIRES

Corporate Profile

Message from the President

Looking ahead to the future of the mobility society, we will open a “new door” while aiming to be a company with presence that is appreciated by society.

We have changed our company name in January 2019, and opened a new door as Toyo Tire Corporation. Our company, Toyo Tire Corporation, is the only manufacturer in Japan that uses “Tire” in its company name, and this expresses our sense of pleasure, pride, responsibility, and resolve at being involved in the mobility business.

We established ourselves in August 1945 as a manufacturer of tires and other rubber products to meet the needs of the times. Over more than 70 years since then, we have constantly made technical innovations and delivered products reflecting social changes and advances to customers around the world.

Besides polishing the performance and quality, we continue to be particular about producing designs that are brimming with creativity and ingenuity. The generation of differentiated, high-level added value is the company’s philosophy which is driving our activities.

How can we make effective use of not only our intangible assets in the form of our accumulated technology, but also our resources represented by equipment and locations, and maximize their value? To do so, each and every one of our employees must pool their wisdom and join together in agile action. As I see it, this is our distinctive strength and the source of the meaning in our existence.

As many of you are already aware, the automotive industry has reached a profound once-in-a-century turning point.

Our automotive society in ten or twenty years’ time is likely to be quite different from its current state. What are your dreams about our future mobility society? What are your expectations?

The roles of products and the values which is being demanded must be provided to customers and it has started to change in tandem with respect to the changes in our mobility society. We have already been tackling the development of various advanced technologies, and the first signs of the latest technologies for this future are starting to emerge.

In the company philosophy, our Mission sets forth the goal of “creating excitement and surprise with our products that exceed customer expectations and enrich society.” This is our commitment to society, as we make it our creed not only to resolve issues in response to needs, but also to provide new realizations and joy.

All employees are cognizant of our origins as a manufacturing company and aspire to make us a company with presence that is welcomed by society, and I am counting on your continued patronage into the future.

January 2019

Representative Director and President

Overview

Company	Toyo Tire Corporation
Established	August 1, 1945
Paid-in Capital	55,935 million yen
Number of Issued Shares	154,111,029
Number of Employees	12,804(Consolidated, Including Temporary Employees) as of December 31, 2018
Headquarters	2-2-13 Fujinoki, Itami City, Hyogo 664-0847, Japan Phone: +81-72-789-9100
Plants	Sendai Plant/Kuwana Plant/Hyogo Manufacturing Complex, others
Lines of Business	[Tire Business] Tires (for passenger vehicles, trucks & buses, construction machinery, industrial trucks), other related products [Automotive Parts Business] Automobile components

Business Overview (as of December 31, 2018)

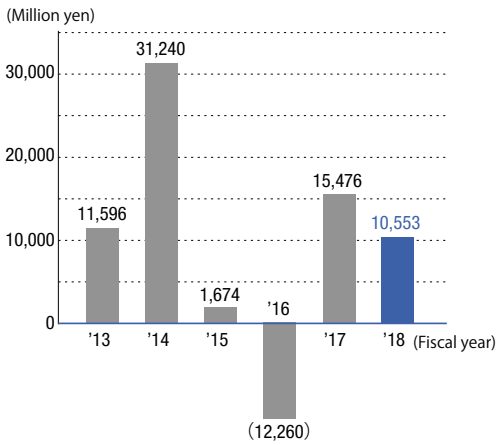

Sales

Operating Income

Current Net Income

The manufacture and sale of tires is the core business of Toyo Tire, accounting for approximately 85% of total sales. We make tire products for passenger vehicles, large vehicles such as SUVs, CUVs and pickup trucks as well as trucks, buses and construction vehicles.

Three Toyo Tire Group Brands

The tire business is comprised of three brands: Toyo Tires, Nitto and Silverstone. Brand-specific business strategy propels the development and supply of products tailored to each brand's target market. These brands are the choice of customers around the world for high performance, quality and distinctive brand character.

TOYO TIRES

Toyo Tires is a trusted, technology-focused global tire brand with an extensive product lineup acclaimed for exceptional performance and quality.
The TRANPATH minivan tire brand was developed as a "specialized tire" and released in 1995, and has been popular in Japan for 20 years as a product that defines the specialized minivan tire.
In 1991 we developed a winter tire that incorporates walnut shells, and it continues to be popular today as a winter tire concept that provides stable driving on slippery winter roads.
The NANOENERGY series made its long-anticipated as the next-generation fuel-efficient tire concept. This tire achieves a premium "AAA" grade based on Japan's labeling system for rolling resistance performance, while combining "a" and "c" grades for wet grip performance. Since it went on sale in Japan, NANOENERGY has been released globally in Europe, Southeast Asia and elsewhere.
In North America, our large-diameter tires for bigger passenger vehicles like SUVs, CUVs and pickup trucks are increasingly popular and highly rated. The OPEN COUNTRY series features an extensive size lineup with superior performance for city and off-road driving proven in rigorous road races, accounting for its popularity in North America as well as the rest of the world.
For small trucks, we developed the DELVEX small-truck brand tire, which delivers improved wear performance and maintainability.
The ZEROSYS fuel-efficient tire brand is our truck and bus tire. Rather than rely on existing technology, this tire was developed from "zero" into a fully finished tire product that supports both cost reduction and environmental conservation.
We also developed the NANOENERGY M638 as the first NANOENERGY brand product in the truck and bus category, offering a large, fuel-efficient route bus tire.

OPEN COUNTRY A/T II

OPEN COUNTRY R/T

TRANPATH ML

NANOENERGY 3 PLUS

M667 ZEROSYS Premium

NANOENERGY M638

NITTO

Nitto is our strategic brand that fuses creativity with unique, innovative designs based on imaginative ideas under the motto of creating products desired by car enthusiasts. The brand enjoys niche-market support particularly among car dress-up and tuning fans in North America, where is has deployed large-diameter, high-value-added tires for light trucks and ultra-high-performance tires.

INVO

Mud Grappler

RIDGE GRAPPLER

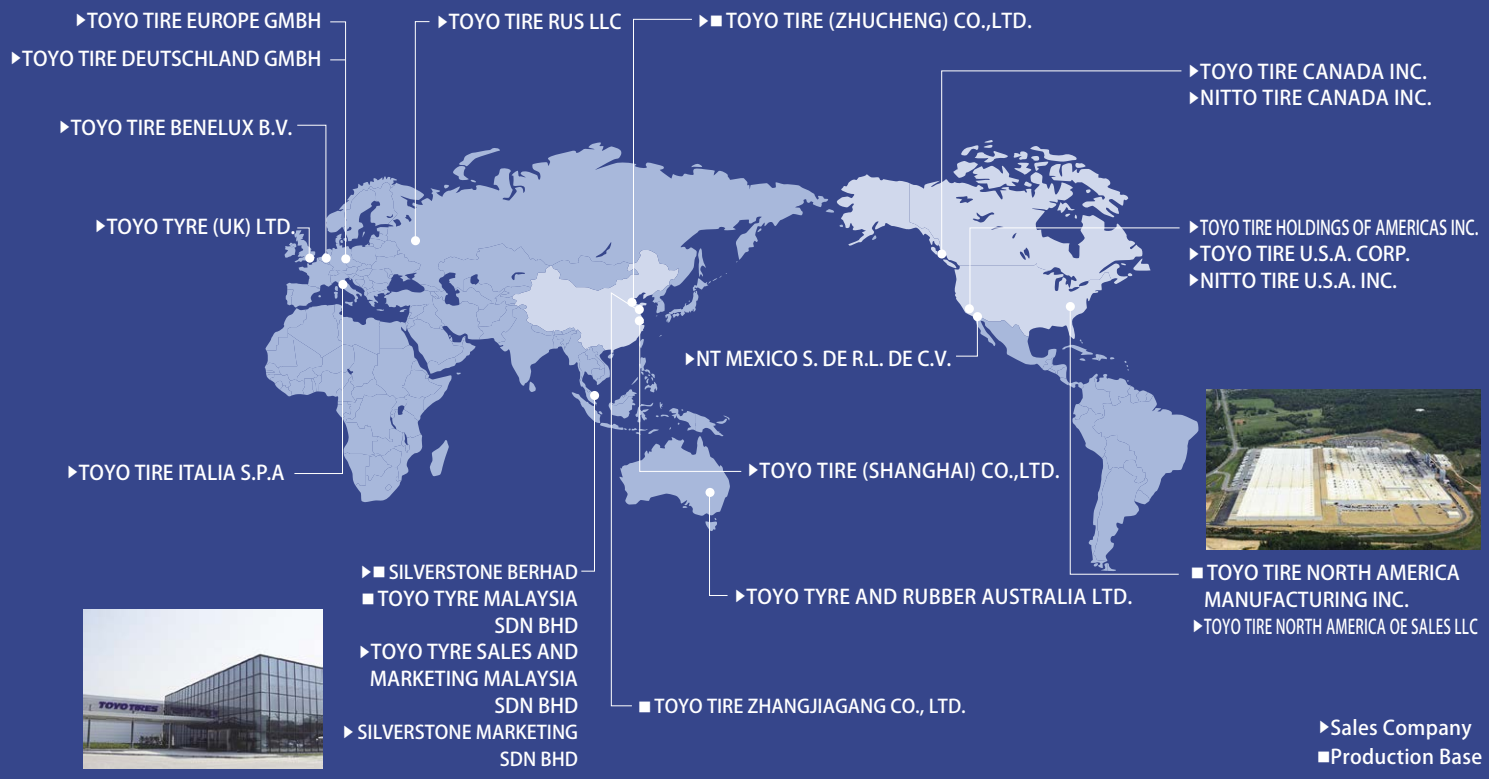

SILVERSTONE
The science of full contact

Silverstone, the famous Malaysian brand, joined the Toyo Tire Group in 2010. Fulfilling large delivery quantities to car manufacturers in Malaysia, SILVERSTONE enjoys considerable local recognition. We are steadily growing this brand around our existing clients as a high dependable tire brand with a clear Southeast Asia presence for passenger cars.

Supply

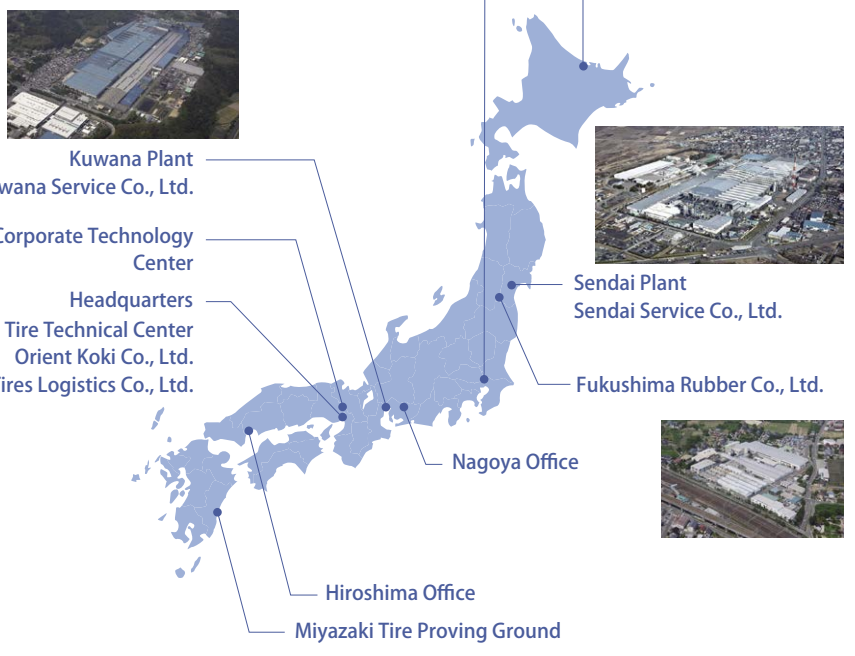

With a growing worldwide tire demand, the Toyo Tire Group is building a global production and supply system to serve North America, Japan and Asia with the aim of ensuring a quick supply of products critical to each regional market.
To ensure consistent, high performance and quality anywhere, our unique philosophy is to continue to refine our technologies and then transplant the latest technology into our newly built plants.
Our unwavering policy is to deliver to the world the high performance and quality (=Japanese quality) that we create as a Japanese tire maker.

Tire Business

We are building a global production and sales infrastructure in Japan and throughout the world.

Along with maintaining and bolstering a tire supply system that has primarily served Japan and North America, we have begun building a global tire sales and supply infrastructure through such initiatives as establishing sales subsidiaries in critical markets in North America, Europe, China, and Southeast Asia.
We announced the expansion of its production capabilities at Toyo Tire North America Manufacturing Inc. ("TNA") facility to fortify its North American business. This expansion had started since January 2016 and completed end of 2016. As a result, TNA became the biggest tire plant in Toyo Tire Group.

Tire and vibration control technologies as the core, Working on new technologies, the development of new products.

The core competence of the Toyo Tire Group is our technical strength. Toyo Tires offers new value through differentiation of its core tire and vibration control technologies.

We are working to raise the bar of quality even higher through our tire technologies: Nano Balance Technology, which controls rubber material design at the molecular level; T mode, a design platform technology that radically reduces tire development lead time; e-balance, our new environmentally friendly truck & bus tire technology platform; and A.T.O.M., which achieves high-quality tire production.

Utilizing our vibration control technologies, featuring our core anti-vibration rubber that controls passenger car engine and body vibration, we are focused on developing next-generation strategic products in the auto parts market. We are also working to develop new products by integrating technologies developed independently for tires and auto components.

Nano Balance Technology

A proprietary design platform technology that integrates four nano-level elements—research, analysis, design and production—into the technology development process, resulting in tire design that achieves optimal performance.

T mode

Beyond a tire's behavior and composition, analyzing the movement of the car enables tire design that perfectly matches each individual type of car and use.

e-balance

A new technology for truck and bus tires that achieves the "e" effect of ecology, energy, economy and endurance.

A.T.O.M. (Advanced Tire Operation Module)

A.T.O.M. is a highly scalable, proprietary system that can flexibly respond to changes in production plans as market demand trends dictate. It features high quality, a small footprint, multi-product small-lot production, and a high level of automation.

Technology to support business development center

We are embracing the challenge of raising new tire performance to a new level, performing precise performance evaluations to deliver remarkable products to society. In developing tire technology, the Tire Technology Center is where we refine our proprietary knowledge and cutting-edge technology, and where we perform actual vehicle testing on two tire test courses.

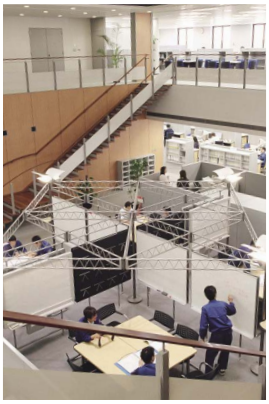

The keys to our Automotive Parts Business are gathering information on new technology in the ever-evolving automobile industry, establishing new technologies in order to achieve the performance requirements of car makers, and developing high-added-value products. The Automotive Parts Technical Center is where we tackle these keys from multiple angles and develop the technical capability to analyze and evaluate in order to create the exact auto parts that customers are seeking.

The Tire Technology Center (Hyogo)

The Automotive Parts Tire Technology Center (Aichi)

The Meeting Space, Tire Technology Center

Tire Test Cource (Miyazaki)

Tire Test Cource (Hokkaido)

Corporate Technology Center, Developing Core Technology to Support the Future

The Corporate Technology Center, where we establish the direction of technology development for the company as a whole, is positioned in the company as a common platform from which basic technology flows down to each business unit. The Corporate Technology Center develops the seeds of proprietary technology in each business unit, which in turn leads to individual manufacturing technology. The Center is also working on new research with an aim of developing technologies of the future.

The Toyo Tires Group is further working to create new materials and technologies, boost our core technology and enhance the environment of our research centers in order to contribute to growth of our core businesses, and we are further bolstering our research and testing environments with our sights set on creating new businesses.

Toyo Tires is also harnessing its production technology functions to create a synergistic effect in an effort to fortify our R&D foundation that will support our company's business well into the future.

Corporate Technology Center (Hyogo)

Automotive Parts Business

■ TOYO AUTOMOTIVE PARTS (GUANGZHOU) CO., LTD.

■ TOYO AUTOMOTIVE PARTS (USA), INC.
■ TMM (USA), INC.

▸ TOYO AUTOMOTIVE PARTS DE MEXICO, S.A. DE C.V.

▸■ TOYO RUBBER CHEMICAL PRODUCTS (THAILAND) LIMITED

▸TOYO TIRE NORTH AMERICA OE SALES LLC

▸ Sales Company
■ Production Base

Toyo Tires is fortifying our development, production and sales infrastructure as we aim to expand strategic businesses in growth markets.

In our Automotive Parts business, to divest a major part of our Chemical Industrial Products business and Rigid Polyurethane Foam business end of 2017, we will hereafter focus on our Automotive Parts business in order to strengthen the momentum of its operations. In order to optimally supply car makers with anti-vibration rubber for automobiles, we have established production plants in three countries in North America and elsewhere in addition to three plants in Japan to meet our customers' needs. With the car market continuing to grow in Asia, from 2013 we began sales of anti-vibration rubber for automobiles in Thailand, and will also began sales from 2014 in Mexico.

August 1945	Toyo Rubber Industrial, established, strengthened and developed by Toyo Boseki (today known as Toyobo) in order to develop the rubber industry, merged with Hirano Rubber Manufacturing; Toyo Tire & Rubber Co., Ltd. established
July 1953	Opens Itami Plant for motor vehicle tire manufacturing (Itami City, Hyogo Prefecture)
May 1955	Lists on the Tokyo Stock Exchange
December 1961	Sets up the Central R&D Laboratories (currently the Corporate Technology Center) in Hyogo
July 1966	Establishes its first tire sales subsidiary, Toyo Tire (U.S.A.) Corp. (currently Toyo Tire U.S.A. Corp.) in U.S.
April 1971	Opens Akashi Plant in Hyogo for pollution control devices and industrial rubber products manufacturing (Kako, Hyogo Prefecture)
February 1974	Acquires capital in Vaculug Australia Ltd. (currently Toyo Tyre and Rubber Australia Ltd.)
September 1975	Establishes Toyo Reifen GmbH (currently Toyo Tire Europe GmbH) tire sales subsidiary in Europe as a joint venture with Mitsubishi Corporation
February 1979	Establishes a comprehensive business partnership with Nitto Tire Co., Ltd.
April 1986	Opens the Automotive Parts Technical Center in Miyoshi City, Aichi Prefecture
October 1996	Merges with Ryoto Tire Co., Ltd.
February 2001	Establishes Toyo Automotive Parts (U.S.A.), Inc. in Kentucky, U.S.A., for anti-vibration rubber parts manufacturing and sales
November 2001	Opens Toyo Technical Center (currently the Tire Technical Center) in Itami City, Hyogo Prefecture
January 2003	Establishes Toyo Tire (Shanghai) Co., Ltd. in Shanghai, China, as a joint venture with Mitsubishi Corporation
June 2004	Establishes Toyo Tire North America, Inc. (currently Toyo Tire North America Manufacturing Inc.) in Georgia, U.S.A., for tire manufacturing
September 2004	Establishes Toyo Automotive Parts (Guangzhou) Co., Ltd. in Guangzhou, China, for anti-vibration rubber parts manufacturing
July 2005	Establishes Toyo Tyre (UK) Ltd. in Rushden, U.K and Toyo Tire Benelux B.V. in Roosendaal, Netherlands
April 2006	Integrates Toyo Soflan Co., Ltd. and Chubu Soflan Co., Ltd. to establish Toyo Soflan Co., Ltd.
November 2006	Acquires Toyo Tire Italia S.p.A in Collesalvetti, Italy
April 2007	Integrates 10 tire subsidiaries to establish Toyo Tire Japan Co., Ltd.
May 2008	Concludes business and capital alliance agreement with Bridgestone Corporation
June 2008	Opens the Iberia representative office in Madrid, Spain Establishes Toyo Tire North America OE Sales LLC in California, U.S.A.
October 2008	Establishes Toyo Tire RUS LLC in Moscow, Russia
April 2010	Establishes Toyo Tire Zhangjiagang Co., Ltd., a subsidiary in Jiangsu, China, for passenger and light truck tires manufacturing
December 2010	Completes acquisition of Silverstone Berhad, the motor vehicle tire manufacturer and seller in Kuala Lumpur, Malaysia
April 2011	Establishes motor vehicle production subsidiary Toyo Tyre Manufacturing (Malaysia) Sdn Bhd in Perak, Malaysia
June 2011	Completes acquisition of Shandong Silverstone Luhe Rubber & Tyre Co., Ltd., the motor vehicle tire manufacturer and seller in China, and changes its name to Toyo Tire (Zhucheng) Co., Ltd.
December 2011	Establishes sales subsidiary company for automotive anti-vibration rubber products Toyo Rubber Chemical Products (Thailand) Limited in Ayutthaya Province, Thailand
December 2012	Changes name of tire production subsidiary Toyo Tyre Manufacturing (Malaysia) Sdn Bhd in Perak, Malaysia to Toyo Tyre Malaysia Sdn Bhd
October 2013	Establishes sales subsidiary company for automotive anti-vibration rubber products Toyo Automotive Parts de Mexico S.A. de C.V
December 2013	Opens the Corporate Technology Center (Hyogo) as part of its relocation project of Central Research Center (the former Technical Research Center, Osaka)
May 2017	Relocates its headquarters to Itami City, Hyogo from Nishi-ku, Osaka
December 2017	Divests chemical industrial products business (excluding seismic isolation rubber for construction) and rigid polyurethane foam business
November 2018	Capital and business alliance agreement with Mitsubishi Corporation
December 2018	Divests flexible urethane foam business
January 2019	Changes trade name to Toyo Tire Corporation
