

TOYO TIRES

Corporate Profile

Message from the President

Further Enhancing Our Strengths to Reach the Next Corporate Stage and Make Our Unique Presence Felt More Strongly

A proud member of a corporate group bearing the word “tire” in its name, we at the Toyo Tire Group remain committed to supporting and enriching the mobility society through our business undertakings.

About 15 years ago, our innovative tire manufacturing technology, which was developed under a novel concept, gave birth to a new tire for large vehicles in the United States. Tough yet aggressively designed, this proprietary tire came to be in response to a latent need in the market. Hitting the bullseye of American desires, the large-diameter tire kindled the passion of car enthusiasts.

I am delighted to say that “TOYO TIRES” and “NITTO” have become first-choice brands of tires for full-scale large SUVs, vehicles that have set the trend in North America. These two brands are now an integral part of car culture in the United States.

Since it began operations in 2005, our U.S. plant has continuously expanded and ramped up its production capacity over five phases, with the result that our North American business has grown to be the main source of revenue for the Group.

We know that the Toyo Tire Group cannot take advantage of scale. Rather, our management teams, past and present, have been able to sustain business growth by capitalizing on our relatively small size to act flexibly and with agility and to “leverage our unique strengths.” We intend to create a growth spiral and move up it by seeking ways to put the resources available to us to optimal use.

Our growth spiral starts by further strengthening distinctive areas of specialty. What this means is to keep appropriately investing in projects that allow us to tap into our strengths and to harvest the fruits of past endeavors. At the same time, we will set about addressing challenges that have hitherto not been adequately addressed, find solutions to and overcome each of them, and, as a result, further enhance our strengths. Having formulated them into policies, we are going to move up to the next corporate stage.

Our goal is to become a corporate group that is needed by society and has a unique presence. To this end, we will not only deliver attractive products in a timely manner throughout the globe by staying half a step or one step ahead of the market needs, but we will also work to bring about the new mobility society of the future by utilizing cutting-edge technologies, thereby contributing to the promotion and progress of the automobile industry and the revitalization of a flourishing car culture. Furthermore, we will also put our energy into solving social issues such as environmental degradation and human rights, by being mindful of and contributing to the establishment of a sound value chain.

I ask for your continued expectations and patronage for the Toyo Tire Group.

January 2021

Representative Director, President & CEO

Overview

Company	Toyo Tire Corporation
Established	August 1, 1945
Paid-in Capital	55,935 million yen
Number of Issued Shares	154,111,029
Number of Employees	13,132(Consolidated, Including Temporary Employees) as of December 31, 2019
Headquarters	2-2-13 Fujinoki, Itami City, Hyogo 664-0847, Japan Phone: +81-72-789-9100
Plants	Sendai Plant/Kuwana Plant/Hyogo Manufacturing Complex, others
Lines of Business	[Tire Business] Tires (for passenger vehicles, light truck, trucks & buses), other related products [Automotive Parts Business] Automobile components

Business Overview (as of December 31, 2020)

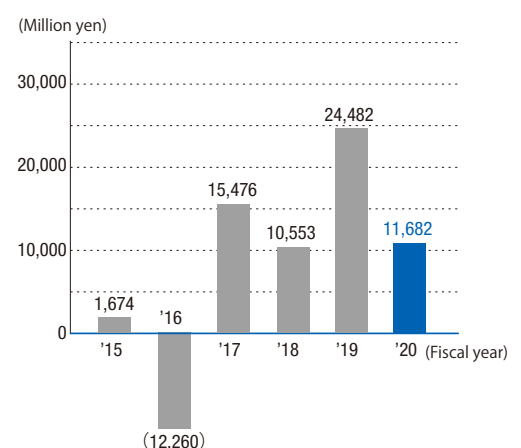

Sales

Operating Income

Current Net Income

The manufacture and sale of tires is the core business of Toyo Tire, accounting for approximately 90% of total sales. We make tire products for passenger vehicles, large vehicles such as SUVs, CUVs and pickup trucks as well as trucks and buses.

Three Toyo Tire Group Brands

The tire business is comprised of three brands: Toyo Tires, Nitto and Silverstone. Brand-specific business strategy propels the development and supply of products tailored to each brand’s target market. These brands are the choice of customers around the world for high performance, quality and distinctive brand character.

TOYO TIRES

Toyo Tires is a trusted, technology-focused global tire brand with an extensive product lineup acclaimed for exceptional performance and quality.

The TRANPATH minivan tire brand was developed as a “specialized tire” and released in 1995, and has been popular in Japan for 20 years as a product that defines the specialized minivan tire.

In 1991 we developed a winter tire that incorporates walnut shells, and it continues to be popular today as a winter tire concept that provides stable driving on slippery winter roads.

The NANOENERGY series made its long-anticipated as the next-generation fuel-efficient tire concept. This tire achieves a premium “AAA” grade based on Japan’s labeling system for rolling resistance performance, while combining “a” and “c” grades for wet grip performance. Since it went on sale in Japan, NANOENERGY has been released globally in Europe, Southeast Asia and elsewhere.

In North America, our large-diameter tires for bigger passenger vehicles like SUVs, CUVs and pickup trucks are increasingly popular and highly rated. The OPEN COUNTRY series features an extensive size lineup with superior performance for city and off-road driving proven in rigorous road races, accounting for its popularity in North America as well as the rest of the world.

For small trucks, we developed the DELVEX small-truck brand tire, which delivers improved wear performance and maintainability.

The ZEROSYS fuel-efficient tire brand is our truck and bus tire. Rather than rely on existing technology, this tire was developed from “zero” into a fully finished tire product that supports both cost reduction and environmental conservation.

We also developed the NANOENERGY M638 as the first NANOENERGY brand product in the truck and bus category, offering a large, fuel-efficient route bus tire.

NANOENERGY M638

NITTO

Nitto is our strategic brand that fuses creativity with unique, innovative designs based on imaginative ideas under the motto of creating products desired by car enthusiasts. The brand enjoys niche-market support particularly among car dress-up and tuning fans in North America, where it has deployed large-diameter, high-value-added tires for light trucks and ultra-high-performance tires.

Silverstone, the famous Malaysian brand, joined the Toyo Tire Group in 2010. Fulfilling large delivery quantities to car manufacturers in Malaysia, SILVERSTONE enjoys considerable local recognition. We are steadily growing this brand around our existing clients as a high dependable tire brand with a clear Southeast Asia presence for passenger cars.

RIDGE GRAPPLER

Supply

With a growing worldwide tire demand, the Toyo Tire Group is building a global production and supply system to serve North America, Japan and Asia with the aim of ensuring a quick supply of products critical to each regional market.

To ensure consistent, high performance and quality anywhere, our unique philosophy is to continue to refine our technologies and then transplant the latest technology into our newly built plants.

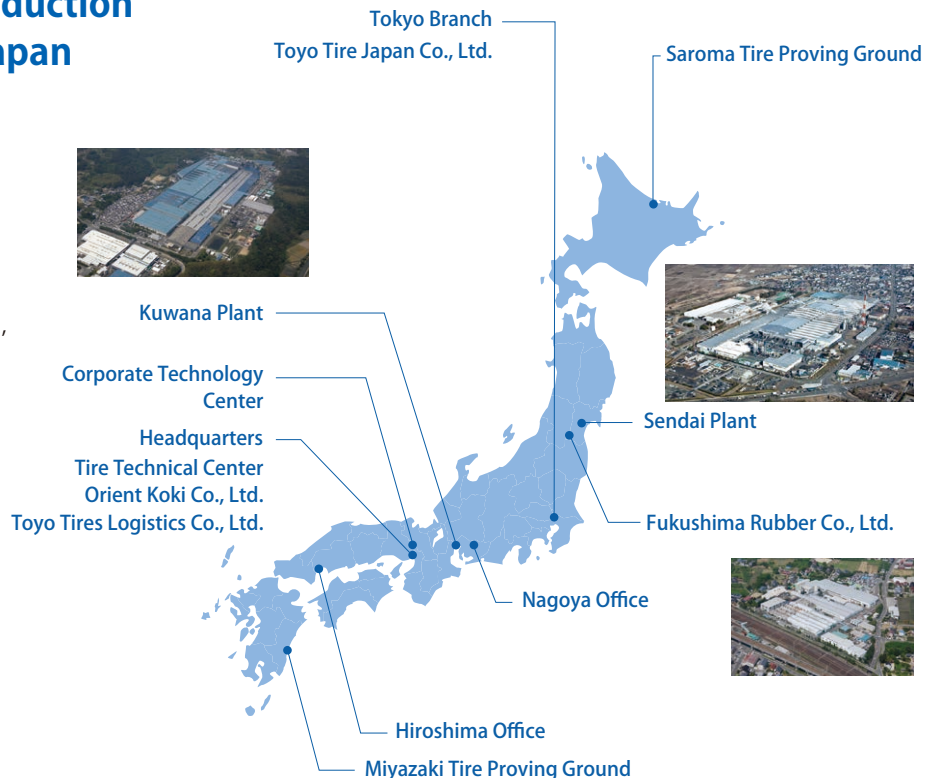

Our unwavering policy is to deliver to the world the high performance and quality (=Japanese quality) that we create as a Japanese tire maker.

Tire Business

We are building a global production and sales infrastructure in Japan and throughout the world.

Along with maintaining and bolstering a tire supply system that has primarily served Japan and North America, we have begun building a global tire sales and supply infrastructure through such initiatives as establishing sales subsidiaries in critical markets in North America, Europe, China, and Southeast Asia. We announced the expansion of its production capabilities at Toyo Tire North America Manufacturing Inc. ("TNA") facility to fortify its North American business. This expansion had started since January 2016 and completed end of 2016. As a result, TNA became the biggest tire plant in Toyo Tire Group.

Tire and vibration control technologies as the core, Working on new technologies, the development of new products.

The core competence of the Toyo Tire Group is our technical strength. Toyo Tires offers new value through differentiation of its core tire and vibration control technologies.

We are working to raise the bar of quality even higher through our tire technologies: Nano Balance Technology, which controls rubber material design at the molecular level; T-MODE, a high-efficiency and high-precision tire design base technologies through fusion with AI; e-balance, our new environmentally friendly truck & bus tire technology platform; and A.T.O.M., which achieves high-quality tire production.

Utilizing our vibration control technologies, featuring our core anti-vibration rubber that controls passenger car engine and body vibration, we are focused on developing next-generation strategic products in the auto parts market. We are also working to develop new products by integrating technologies developed independently for tires and auto components.

Nano Balance Technology

Being the essential material of tires, TOYO TIRES' rubber has a technologically unique and exclusive design on a nano level (1 nanometer = 1 billionth of a meter). Our rubber is derived through simulation, function creation, precision control and research. That is Nano Balance Technology from Toyo Tires.

T-MODE

T-MODE is a platform using simulations with AI integrated design technology to develop innovative tires with even higher speed and more functions.

e-balance

A new technology for truck and bus tires that achieves the "e" effect of ecology, energy, economy and endurance.

A.T.O.M. (Advanced Tire Operation Module)

A.T.O.M. is a highly scalable, proprietary system that can flexibly respond to changes in production plans as market demand trends dictate. It features high quality, a small footprint, multi-product small-lot production, and a high level of automation.

Technology to support business development center

We are embracing the challenge of raising new tire performance to a new level, performing precise performance evaluations to deliver remarkable products to society. In developing tire technology, the Tire Technology Center is where we refine our proprietary knowledge and cutting-edge technology, and where we perform actual vehicle testing on two tire test courses.

The keys to our Automotive Parts Business are gathering information on new technology in the ever-evolving automobile industry, establishing new technologies in order to achieve the performance requirements of car makers, and developing high-added-value products. The Automotive Parts Technical Center is where we tackle these keys from multiple angles and develop the technical capability to analyze and evaluate in order to create the exact auto parts that customers are seeking.

The Tire Technology Center (Hyogo)

The Automotive Parts Tire Technology Center (Aichi)

The Meeting Space, Tire Technology Center

Tire Test Course (Miyazaki)

Tire Test Course (Hokkaido)

Corporate Technology Center, Developing Core Technology to Support the Future

The Corporate Technology Center, where we establish the direction of technology development for the company as a whole, is positioned in the company as a common platform from which basic technology flows down to each business unit. The Corporate Technology Center develops the seeds of proprietary technology in each business unit, which in turn leads to individual manufacturing technology. The Center is also working on new research with an aim of developing technologies of the future.

The Toyo Tires Group is further working to create new materials and technologies, boost our core technology and enhance the environment of our research centers in order to contribute to growth of our core businesses, and we are further bolstering our research and testing environments with our sights set on creating new businesses.

Toyo Tires is also harnessing its production technology functions to create a synergistic effect in an effort to fortify our R&D foundation that will support our company's business well into the future.

■ Production Base

Toyo Tires is fortifying our development, production and sales infrastructure as we aim to expand strategic businesses in growth markets.

In order to optimally supply car makers with anti-vibration rubber for automobiles, we have established production plants in three countries in North America and elsewhere in addition to three plants in Japan to meet our customers' needs. With the car market continuing to grow in Asia, from 2013 we began sales of anti-vibration rubber for automobiles in Thailand, and will also begin sales from 2014 in Mexico.

Bushes

Engine Mounts (Fluid-filled)

August 1945	Toyo Rubber Industrial, established, strengthened and developed by Toyo Boseki (today known as Toyobo) in order to develop the rubber industry, merged with Hirano Rubber Manufacturing; Toyo Tire & Rubber Co., Ltd. established
July 1953	Opens Itami Plant for motor vehicle tire manufacturing (Itami City, Hyogo Prefecture)
May 1955	Lists on the Tokyo Stock Exchange
December 1961	Sets up the Central R&D Laboratories (currently the Corporate Technology Center) in Hyogo
July 1966	Establishes its first tire sales subsidiary, Toyo Tire (U.S.A.) Corp. (currently Toyo Tire U.S.A. Corp.) in U.S.
April 1971	Opens Akashi Plant in Hyogo for pollution control devices and industrial rubber products manufacturing (Kako, Hyogo Prefecture)
February 1974	Acquires capital in Vaculug Australia Ltd. (currently Toyo Tyre and Rubber Australia Ltd.)
September 1975	Establishes Toyo Reifen GmbH (currently Toyo Tire Europe GmbH) tire sales subsidiary in Europe as a joint venture with Mitsubishi Corporation
February 1979	Establishes a comprehensive business partnership with Nitto Tire Co., Ltd.
April 1986	Opens the Automotive Parts Technical Center in Miyoshi City, Aichi Prefecture
October 1996	Merges with Ryoto Tire Co., Ltd.
February 2001	Establishes Toyo Automotive Parts (U.S.A.), Inc. in Kentucky, U.S.A., for anti-vibration rubber manufacturing and sales
November 2001	Opens Toyo Technical Center (currently the Tire Technical Center) in Itami City, Hyogo Prefecture
January 2003	Establishes Toyo Tire (Shanghai) Co., Ltd. in Shanghai, China, as a joint venture with Mitsubishi Corporation
June 2004	Establishes Toyo Tire North America, Inc. (currently Toyo Tire North America Manufacturing Inc.) in Georgia, U.S.A., for tire manufacturing
September 2004	Establishes Toyo Automotive Parts (Guangzhou) Co., Ltd. in Guangzhou, China, for anti-vibration rubber manufacturing
July 2005	Establishes Toyo Tyre (UK) Ltd. in Rushden, U.K and Toyo Tire Benelux B.V. in Roosendaal, Netherlands
April 2006	Integrates Toyo Soflan Co., Ltd. and Chubu Soflan Co., Ltd. to establish Toyo Soflan Co., Ltd.
November 2006	Acquires Toyo Tire Italia S.p.A in Collesalvetti, Italy
April 2007	Integrates 10 tire subsidiaries to establish Toyo Tire Japan Co., Ltd.
January 2008	Establishes Toyo Tire Holdings of Americas Inc. in California, U.S.A., for holding company of North American business
May 2008	Concludes business and capital alliance agreement with Bridgestone Corporation
June 2008	Opens the Iberia representative office in Madrid, Spain Establishes Toyo Tire North America OE Sales LLC in California, U.S.A.
October 2008	Establishes Toyo Tire RUS LLC in Moscow, Russia
April 2010	Establishes Toyo Tire Zhangjiagang Co., Ltd., a subsidiary in Jiangsu, China, for passenger and light truck tires manufacturing
December 2010	Completes acquisition of Silverstone Berhad, the motor vehicle tire manufacturer and seller in Kuala Lumpur, Malaysia
April 2011	Establishes Toyo Tyre Manufacturing (Malaysia) Sdn Bhd in Perak, Malaysia for motor vehicle tire manufacturer and seller
June 2011	Completes acquisition of Shandong Silverstone Luhe Rubber & Tyre Co., Ltd., the motor vehicle tire manufacturer and seller in China, and changes its name to Toyo Tire (Zhucheng) Co., Ltd.
December 2011	Establishes Toyo Rubber Chemical Products (Thailand) Limited in Ayutthaya Province, Thailand for anti-vibration rubber manufacturing and sales
October 2013	Establishes Toyo Automotive Parts de Mexico S.A. de C.V for anti-vibration rubber manufacturing and sales
December 2013	Opens the Corporate Technology Center (Hyogo) as part of its relocation project of Central Research Center (the former Technical Research Center, Osaka)
May 2015	Establishes Toyo Tire Deutschland GmbH in Willich, Germany
May 2017	Relocates its headquarters to Itami City, Hyogo from Nishi-ku, Osaka
November 2018	Capital and business alliance agreement with Mitsubishi Corporation
January 2019	Changes trade name to Toyo Tire Corporation Opens North America R&D Center in Georgia, U.S.A.
October 2019	Establishes Toyo Tire Serbia LLC Belgrade in Belgrade, the Republic of Serbia, for tire manufacturing
November 2019	Opens European R&D Center in Willich, Germany
